Reed College BA, Physics. Portland, Oregon.

May 2011

- Thesis on the use of numerical differential equation solving and genetic algorithms to simulate and optimize human movement.
 - Course work in calculus, linear and abstract algebra, scientific computation, electrodynamics, elementary particles, as well as classical, quantum, thermal, and solid-state physics.
 - Projects included measuring the temperature dependence of diode reverse bias leakage current, improvised synthesis of fullerenes using a welding power supply, and creation of an interactive computer model simulating the interaction and collision of charged particles.
-

Course Developer Udacity Inc. Mountain View, California.

February 2015–Present

- Created UD867: Gradle for Android and Java, an online course with over 10,000 enrolled students.
 - Built a forthcoming Java game development course in partnership with Amazon.
-

Course Manager Udacity Inc. Mountain View, California.

April 2014–February 2015

- Mentored students in numerous courses including Intro to Data Science, Developing Android Apps, Software Architecture and Design, and Intro to Hadoop and MapReduce.
 - Lead testing and quality assurance on Intro to Machine Learning, Data Visualization, and Model Building and Validation.
-

Hardware Laboratory Intern Allion USA, Portland, Oregon.

January 2014–April 2014

- Built stages of a machine vision pipeline for real-time processing of high speed camera output.
 - Invented a class of ternary/n-ary codes with desirable Hamming distance properties.
-

Scientific Applications Intern Apple Inc. Portland, Oregon.

June 2011–August 2013

- Developed novel algorithms with the Advanced Computation Group in the fields of sound compression, image compression, image enhancement, machine vision, and error correction coding.
 - Created 3D scanning and printing laboratory and wrote tools for interactive markup of 3D meshes.
 - Coinvented, prototyped, and wrote patent documentation for a novel image magnification algorithm. Collaborated on a real-time OpenCL implementation of the algorithm.
-

Requalification Supervisor Reed Research Reactor, Portland, Oregon.

May 2010–May 2011

- Created and administered written and practical exams to the staff, gave training and requalification lectures, and founded an enrichment lecture series.
-

Senior Reactor Operator Reed Research Reactor, Portland, Oregon.

August 2009–May 2011

- Performed and supervised reactor power changes, calibrated radiation monitors, and performed neutron activation analysis experiments.
 - Participated in control rod and fuel inspections, thermal power calibration, and refueling operations. Organized and performed recovery of a dropped fuel element.
-

Skills

- Python, Java, C, C++, Objective-C, Swift, SQL, HTML, CSS, and JavaScript.
 - Android, Google AppEngine, Polymer, OpenGL/CL/CV, LibGDX, SKLearn, and NLTK.
 - Git, Mercurial, Gradle, Mathematica, MATLAB, LabVIEW, and L^AT_EX.
-
